## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments, see arguments, filed 11/03/2006, with respect to the rejection(s) of claim(s) 15-17 and 32 under 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Hawkswell USPN 4,687,152 as modified by Briehl 5,941,674 or Umetsu et al. USPN 5,289,625.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-17 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hawkswell USPN 4,687,152 in view of Briehl 5,941,674 or Umetsu et al. USPN 5,289,625.

Hawkswell discloses a parts feeding device comprising:

(Re claim 15) "a feeding unit installed on a main frame, the feeding unit comprising" (52 figure 2). "a tape at a predetermined pitch interval" (38 figure 2). "a vinyl separation unit" (68 figure 2). "a vinyl recovery unit" (70 figure 2).

Hawkswell does not disclose that the feeding unit is capable of moving forward and backwards driven by a force generating device comprising a plurality of armature coils and a magnet unit.

Briehl and Umetsu both teach a feeding unit capable of moving forward and backwards driven by a force generating device comprising a plurality of armature coils and a magnet unit.

It would be obvious to one skilled in the art to modify Hawkswell to make the feeding unit capable of moving forward and backwards and driven by a force generating device comprising a plurality of armature coils and a magnet unit because it uses fewer moving parts making the device simpler and more robust.

(Re claim 16) "vinyl separation unit utilizes rotational force generated by the feeding unit" (48 figure 2, Hawkswell).

(Re claim 17) "vinyl recover unit is connected to the vinyl separation unit by a belt and recovers the vinyl" (76 figure 2, Hawkswell).

(Re claim 32) "a surface mounting device" (23 figure 1, Hawkswell).

### ***Allowable Subject Matter***

Claims 18-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
